Hiring Manager

One Planet International
Schools Addis Ababa, Ethiopia

Dear Hiring Manager,

I am writing to express my interest in the **Mathematics Teacher** position at **One Planet International Schools**. I have Bsc Degree in Software Engineering from Jima University and I have accumulated over 8 years of experience working closely with students at various academic levels.

During my high school and preparatory years, I provided Mathematics and Physics tutorials for students from Grade 9 to Grade 12. Later, upon joining Jimma University, I delivered Applied One/Two, C++, and Python programming tutorials to university freshmen and sophomores for consecutive 4 years until my graduation. In all almost 2 hundreds students attend my Mathematics tutor. These extensive teaching and mentoring experiences have strengthened my communication, organization, and classroom management skills, which I believe align well with the values and standards of your institution.

I am truly excited about the opportunity to contribute to a learning-centered institution such as **One Planet International Schools**, where education, integrity, and excellence are top priorities. I would be honored to bring my skills, dedication, and enthusiasm to your teaching team and support the school's mission of providing quality education.

Thank you for considering my application. I look forward to the opportunity to discuss how my experience and commitment can contribute to your organization's continued success.

Software Engineer is my profession but teaching maths is my passion. For the radical change of your students mathematics status I'm your best choice

Sincerely,

Yared Berhanu

Yared Berhanu Bodena

I am a dedicated Software Engineer with solid experience in Python and backend development using Django. I develop secure and efficient server-side solutions and work effectively with databases. I have hands-on experience with Generative AI tools such as TensorFlow and OpenAI to build intelligent applications. I am a reliable team player, eager to learn, and committed to delivering quality software that meets business needs.

WORK EXPERIENCE

JU Inovation and Incubation Center

Backend Developer Intern Sep 2023 - January 2024

- Developed a robust pharmacy management system to handle inventory, prescriptions, and sales tracking, improving operational efficiency for clinics and pharmacies.
- Built secure and scalable **RESTful APIs using Django and Django REST Framework**, enabling smooth communication between modules.
- Optimized complex queries in PostgreSQL, reducing database response time by 20% and ensuring real-time data access.
- Implemented **JWT-based authentication and role-based access control** for pharmacists, doctors, and admins, protecting data for 500+ users.
- Participated in code reviews and followed Agile development practices, ensuring continuous integration and high-quality code delivery.
- Deployed the application on **AWS EC2** and configured backups and monitoring to maintain 99.9% uptime and system reliability.

EDUCATION

Jima University

Bachelor of Science (BSc) in Software Engineering - 3.28 2021 - 2025

PROJECTS

Online Birth Certificate System 2022 - 2022

- Developed a secure and efficient online birth certificate management system to streamline certificate requests, processing, and digital record-keeping.
- Implemented user authentication (registration, login, password reset) using JWT-based access control, ensuring data security for 1,000+ registered users.
- Designed and developed a dynamic certificate management dashboard with full CRUD operations, improving application processing speed and accuracy.
- Enabled multi-role access for administrators, registrars, and applicants, enhancing workflow coordination and service delivery.
- Integrated email notifications for application status updates and reminders, reducing user follow-up inquiries by 20%.
- Built using Django, Django REST Framework, PostgreSQL, and Amazon EC2, ensuring scalability, performance, and security.

Freshman Guide App 2024 - 2025

- Developed a web-based guide platform to assist first-year university students in navigating campus life, academics, and resources.
- Designed and implemented a backend system using Django and Django REST Framework, managing structured content such as tips, FAQs, maps, and contact information.
- Built a secure login and registration system with JWT authentication, allowing students to personalize their experience and save resources.
- Integrated search and filter features to improve accessibility of information, reducing user frustration and support requests.
- Managed data storage with PostgreSQL, ensuring high data integrity and fast retrieval.
- Deployed the platform on AWS EC2, enabling reliable access and scalability across multiple user groups.

SKILLS

Technical and Soft Skills

- **Programming Languages:** Python, JavaScript, SQL, HTML, CSS
- **Frameworks & Libraries:** Django, Django REST Framework, React.js,
- **Database Technologies:** PostgreSQL, MongoDB
- **API Development:** RESTful API Design, JWT Authentication, CRUD Operations
- **Version Control & DevOps:** Git, GitHub, AWS EC2, AWS S3, Heroku
- **Tools & Environments:** Linux (Kali), Postman, Visual Studio Code, Docker (basic), Agile/Scrum
- Strong problem-solving and analytical thinking
- Excellent communication and collaboration
- Adaptability and willingness to learn new technologies
- Attention to detail and focus on code quality
- Time management and ability to meet deadlines
- Team player with experience in Agile teams
